

WORLD BATHING DAY - JUNE 22, 2022

Peninsula Hot Springs are curating a second global celebration of live music and bathing for **World Bathing Day 2022** in the form of a collective showcase concert of live performances filmed on June 22 and then broadcast and shared online. The Global Sound Bath concert will follow the path of the sun around the planet and celebrate the many and varied musical expressions and bathing locations we share around the globe. Welcome to Global Sound Bath Live.

RECORDING YOUR LIVE PERFORMANCE :

Each participating venue will film and present an act or collection of acts that is musically representative of their region, to produce a 15 minute segment (~2 min intro + ~12 min live musical performance ~1 min outro). This will be fed to Peninsula Hot Springs who will then gather all components to produce and share the final global showcase event.

All performances must be filmed and recorded live from each participant/venue's location on June 22 2022, and the high quality audio and visual content then edited down to the final 15 min length ready for sharing. Below are the basic requirements for providing suitable content for the event.

- A highlight local act(s) to film and record on the day and a dedicated location to record the performance in.
- At least one good quality camera/phone + someone to operate this device.
- Someone to "talk to camera" for an introduction to the venue and the act, and perhaps also share what is happening in your part of the world (ie. the season or other unique local characteristics) and then also to end the segment with a "farewell from...."
- Completed Video content should be provided in landscape mode @1080p or 720p minimum and then uploaded to a PHS server to enable broadcast.
- High Speed upload to cloud service for dispatch to PHS.
